

2022 Virtual Retinoblastoma Research Symposium

Child Life Activity

I Am, I Can, I Wish

This fun, open ended activity gives children the opportunity to share cool information and facts about themselves and express who they are! Kids can get creative and share how they see themselves as an individual and within their greater world.

We will have fun exploring what makes each of us unique, and discuss their wishes, fostering and creating opportunity for sharing through conversation and creative arts.

You Will Need:

- Print outs of our “I am, I can, I wish” worksheets (see following pages), or plain paper
- Markers, crayons, pens, paint
- Photos of your child
- Collage materials – stickers, photos cut from magazines, calendars, cards, colourful papers, and/or pictures printed off the web
- Glue or glue stick

I AM...

I CAN...

I WISH...
